Wednesday, November 16, 2016

Immunity to Mycobacterium tuberculosis

Dr. Helen Collins

Faculty of Life Sciences and Medicine
Kings College, London

This lecture will cover the basics of the host immune response to *Mycobacterium tuberculosis* and some of the ways that the organism can evade host immunity. The lecture is designed as an example of the subjects covered at Masters level at Kings College London. The session will also cover an introduction to postgraduate study at Kings and a brief overview of the portfolio of masters programmes offered, particularly highlighting new programmes developed for 2017-18.

All are welcome

Seminar will be held in **DBEB SEMINAR ROOM** at **Block I, Room 223** at **4 PM**
For additional information, contact Seminar coordinator D. Sundar at sundar@dbeb.iitd.ac.in
